HOW TO COMPILE

I assume that you are running on X64 linux OS. To compile the code, you have to do following steps:

1. run "make" command to compile Pinnocho library.

2. Type "sh compile.sh" in myMain folder to compile the code.

HOW TO RUN

In my main folder type "sh run.sh" to run the binary. It will link Pinnocho library for you. Please have your Leap Motion connected before you run the binary.
